All,

I apologize for the delay getting this out -- too much chaos in the office to focus.

But: attached to this email is:

- An excel spreadsheet with my latest version of the agenda and the prospective list of attendees. Attendees are split into workers, policy people who may provide input, and observers.
- A short doc with a short statement of workshop objectives and workshop deliverables.

Please, before Monday, provide an assessment of the invitee list with special view toward balance. Some on the list won't attend and we are aiming for about 26 over all with around 8 observers. Think about balance of expertise and geography especially.

Please look at the agenda again and give me your opinion. I put some organizational thought into it that shows up in the "What" column . We have time to revise it, but I know we'll be asked for an agenda well in advance of the workshop.

And please look at the workshop objectives and deliverables doc and think of what else you would like to see if you received an invitation.

We will compile all on Monday.

Thanks,

Robb
